# Toyota Outside – Sortimo Inside

**... IDEAS FOR PROFESSIONALS**

# The perfect combination

You have chosen a Toyota LCV because it suits your space requirements, is economical and has the quality you need for your trade and service.

Globelyst is the most innovative in-vehicle equipment from Sortimo. Perfectly suited for your Toyota Hiace. Turn your van into a mobile workshop. Flexibility is everything. We have developed an application specific range of modular in-vehicle equipment for your needs.

With the Sortimo Globelyst starter kit you can organise your vehicle for more efficient use. You can personalise your Sortimo system exactly to your own requirements at any stage by choosing from the range of Sortimo accessories.

**Why are you waiting? - Let's start working.**

There is no need to compromise. Even your most unique needs can be met with our Sortimo Globelyst system. A wide variety of service cases, boxes, drawers or troughs hold your small components and spare parts in place. Cargo bars and lashing rails hold the larger items in place. And folding work bench vices make your work easier – wherever you are.

**3 year quality warranty**

**Lift-up flap** space-saving swivel assembly

**Sobogrip® or Soboflex®** Safety floors

**T-BOXX -** the transparent plastic case with insert boxes

# Crash tested for your safety.

At Sortimo, we've got you covered.

Crash testet

Passive safety plays an important role for the automotive industry, however, it is barely evident when it comes to load safety. Sortimo has worked intensively with your duty-of-care in mind on improving in-vehicle load safety systems.

Ultimately, it is the crash test results that determine the range of products that we offer. In cooperation with accident research agencies and the German automobile club we've been conducting live crash tests for more than 20 years.

This is the only way to find out if our equipment meets the current safety criteria.

We've passed all the tests with flying colours as a result of our systematic safety developments. Only these products, which survive the crash testing, will be taken into the Sortimo range.

## Did you know....

At an impact speed of 50 mph, 550 kg of load develops the peak force of 11 tons.

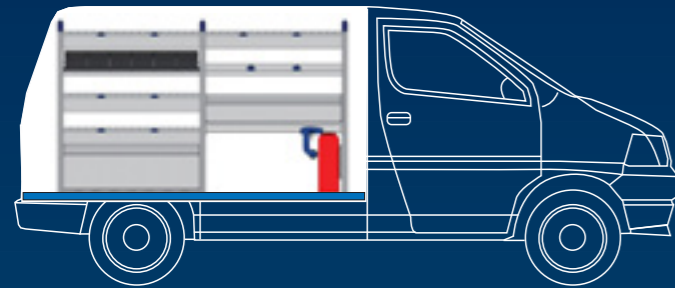

# Toyota Hiace

Wheelbase: 2985 mm

# Mobility has a new dimension

## Four sizes - a thousand options

Transport small components, tools and machines together. The new L-BOXX is the perfect solution for all mobile requirements. Thanks to the user-friendly innovative click system, individual BOXXes click into each other easily.

**L-BOXX®**

**NEW**

The superior ergonomic handling and integration of the L-BOXX into the market leading Sortimo in-vehicle equipment system is a must have for all tradesmen, service technicians and field representatives.

## The mobile office

### Automanager, Autoassistant and Office bag

Being on the road a lot you know the problem; files, samples, notebook – everything has to be carried with you, from the car to the client and then back again. An elegant solution for this problem is the very practical Sortimo **Automanager**.

Securely lashed to the passenger seat and well protected against theft, it is a companion you do not want to be without. With its extensible, rotating notebook table and large inner compartment you have a complete work station on hand.

Everything on board. Everything under control. The Sortimo **Autoassistant** has everything that the mobile tradesman and service technician needs beside them on the passenger seat.

It has a practical desk pad with a bottle holder for a 1.5 litre bottle, a flexible clamp for notes and ample room inside the box for various documents and other items. Two storage pockets for files and brochures at the back round off the system.

Always to hand, regardless of whether you are in the vehicle or outside on your way to a customer. The bag offers ample room for your mobile phone, pens, documents or writing pads. In no time at all, the **office bag** transforms into a file or laptop bag. It is securely fastened by means of quick-release straps to the headrest and the passenger seat.

## The new Sortimo TopSystem

### more than just a roof rack

**Basic solution:**  
 ▶ 4 legs with 2 cross members

**Standard solution:**  
 ▶ 6 legs with 3 cross members  
 ▶ 2 aluminium side rails  
 ▶ 1 loading roller  
 ▶ 3 lashing straps with patented quick release anchors  
 ▶ 4 profile supports for variable installation

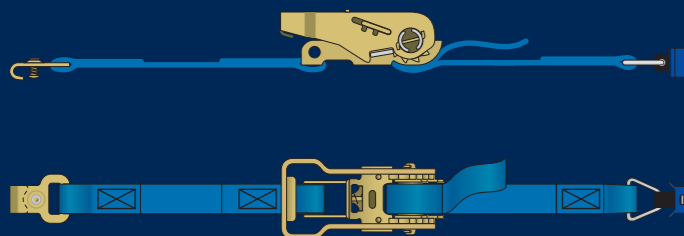

**Premium solution:**  
 ▶ 6 legs with 3 cross members  
 ▶ 2 aluminium side rails  
 ▶ 1 transport tube  
 ▶ 4 profile supports for variable installation  
 ▶ 1 lashing strap with patented quick release anchors  
 ▶ 1 roof rack footbridge  
 ▶ 1 loading roller  
 ▶ 2 orange warning beacons

The sophisticated roof rack system offers you all the variability you need. Depending on your requirements you decide if the basic roof rack solution is sufficient or if you need a solution with added features for your job. The basic roof rack solution can be upgraded whenever you need it.
