PRESS RELEASE

NEW! – Automanager can now be ordered direct on line

Sortimo brings order to your mobile office

With the Automanager, Sortimo Speedwave presents a mobile office solution in the form of a stable multifunctional case. For all those who need to have their "mobile office" with them at all times, the new Automanager from Sortimo Speedwave is the ideal companion.

Whoever is on the road a lot knows the problem: files, folders, notebook and other working materials need to be carted from the office to the car, from the car to the customer and from there to the hotel and then back to the car again. For all mobile professionals, this problem becomes a thing of the past with the Sortimo Speedwave Automanager.

As your agile companion, the Automanager can be secured in place on the passenger seat with the seatbelt and can be transported over even long distances with the optional trolley. The Automanager is equipped with a sturdy pivoted tray which swings out towards the driver to accommodate the notebook and which has a flexible interior space to accommodate a printer and power pack. Because of the flexible interior space, there are a great variety of applications for the Automanager even in private life. Regardless of whether used as a mobile entertainment centre with DVD player and computer games console or as a portable container for everything that usually just lies around in the car.
