

## The Partner of Professionals

At this year's bauma in Munich, Sortimo International will present itself as an ideas factory for professionals. Fatih Yilmaz, target group manager at Sortimo, explains "The leading role of the bauma as the number one trade fair in the world for building machinery as well as the record number of registrations this year motivate us even more to present our innovation power to the trade public at the fair". As the market leader on the sector of in-vehicle equipment systems, the Bavarian company Sortimo will demonstrate its close bond with the construction industry on stand 510 in hall A1.

Sortimo's participation at this year's bauma will be proof-positive of the company's professionalism in the branch. The industry needs no introduction to the Mercedes Benz Sprinter or the Volkswagen T5, then these are standard vehicles in the branch. What will be highlighted are the numerous modules in both vehicles that Sortimo has developed and patented. The central element of these modules is Sortimo Globelyst, the third generation of in-vehicle equipment that makes suitable solutions for every branch of trade and industry and for every type of vehicle possible. Shelves, drawers and cases in a variety of widths and heights can be combined with each other on a special frame, the so-called "space frame".

Sortimo will present two customer vehicles which demonstrate the close bond to the construction industry. Equipped with workbench, vice and numerous shelving and drawer elements to permit the transport of spare parts, Sortimo turns these service vehicles into mobile workshops. The objective is to substantially increase the possibilities of on-site repair procedures by means of customised in-vehicle equipment with the ultimate aim of minimising the downtime of defective machines. This enables a faster response time for the individual company and increases the degree of service for their customers. This competitive edge is already being made use of around the world by renowned Sortimo customers.
